

PUSH

Pressure Ulcer Scale for Healing

Purpose : Monitor the change in pressure ulcer status over time

Admin time : 20 min

User Friendly : High

Administered by : Health care professional

Content : Scale for recording subscores of surface area, exudate, and type of wound tissue. Graphical plotting of total scores to chart change in pressure ulcer status over time

Author : National Pressure
Ulcer Advisory Panel (NPUAP), 1998

Noncommercial Use

Although the PUSH Tool is copyrighted to the NPUAP, you are free to use it for education, research, and practice purposes. Non-commercial users are only required to acknowledge the NPUAP and the “Version Number” of the tool on any hard-copy or electronic reproduction.

This a research-validated tool. Therefore, NPUAP recommends that the content of the tool not be altered or modified by individual users. If you chose to modify the tool, please note that you have made modifications after citing the NPUAP as the original source.

Commercial Use

The PUSH Tool should not be used as part of any “for profit” commercial venture or enterprise without written permission of the NPUAP. Royalties may be required under these circumstances. NPUAP will give you a quote after reviewing your registration form. (Use of the PUSH Tool in the care of patients in “for profit” health care facilities is exempt from this restriction.)

Pressure Ulcer Scale for Healing (PUSH) PUSH Tool 3.0

Patient Name _____ Patient ID# _____
 Ulcer Location _____ Date _____

Directions:

Observe and measure the pressure ulcer. Categorize the ulcer with respect to surface area, exudate, and type of wound tissue. Record a sub-score for each of these ulcer characteristics. Add the sub-scores to obtain the total score. A comparison of total scores measured over time provides an indication of the improvement or deterioration in pressure ulcer healing.

LENGTH X WIDTH (in cm ²)	0 0	1 < 0.3	2 0.3 – 0.6	3 0.7 – 1.0	4 1.1 – 2.0	5 2.1 – 3.0	Sub-score
		6 3.1 – 4.0	7 4.1 – 8.0	8 8.1 – 12.0	9 12.1 – 24.0	10 > 24.0	
EXUDATE AMOUNT	0 None	1 Light	2 Moderate	3 Heavy			Sub-score
TISSUE TYPE	0 Closed	1 Epithelial Tissue	2 Granulation Tissue	3 Slough	4 Necrotic Tissue		Sub-score
							TOTAL SCORE

Length x Width: Measure the greatest length (head to toe) and the greatest width (side to side) using a centimeter ruler. Multiply these two measurements (length x width) to obtain an estimate of surface area in square centimeters (cm²). Caveat: Do not guess! Always use a centimeter ruler and always use the same method each time the ulcer is measured.

Exudate Amount: Estimate the amount of exudate (drainage) present after removal of the dressing and before applying any topical agent to the ulcer. Estimate the exudate (drainage) as none, light, moderate, or heavy.

Tissue Type: This refers to the types of tissue that are present in the wound (ulcer) bed. Score as a “4” if there is any necrotic tissue present. Score as a “3” if there is any amount of slough present and necrotic tissue is absent. Score as a “2” if the wound is clean and contains granulation tissue. A superficial wound that is reepithelializing is scored as a “1”. When the wound is closed, score as a “0”.

- 4 – Necrotic Tissue (Eschar):** black, brown, or tan tissue that adheres firmly to the wound bed or ulcer edges and may be either firmer or softer than surrounding skin.
- 3 – Slough:** yellow or white tissue that adheres to the ulcer bed in strings or thick clumps, or is mucinous.
- 2 – Granulation Tissue:** pink or beefy red tissue with a shiny, moist, granular appearance.
- 1 – Epithelial Tissue:** for superficial ulcers, new pink or shiny tissue (skin) that grows in from the edges or as islands on the ulcer surface.
- 0 – Closed/Resurfaced:** the wound is completely covered with epithelium (new skin).

Pressure Ulcer Healing Chart

To monitor trends in PUSH Scores over time

(Use a separate page for each pressure ulcer)

Patient Name _____ Patient ID# _____

Ulcer Location _____ Date _____

Directions:

Observe and measure pressure ulcers at regular intervals using the PUSH Tool.
